³ Assets under management (AUM) refers to current fair market value of real estate-related assets with respect to which CBRE Global Investors provides, on a global basis, oversight, investment management services and other advice, and which generally consist of properties and real estate-related loans, securities portfolios, and investments in operating companies, joint ventures and in private real estate funds under its fund of funds program. This AUM is intended principally to reflect the extent of CBRE Global Investors' presence in the global real estate market, and its calculation of AUM may differ from the calculations of other asset managers. CBRE Global Investors changed its calculation of AUM with the ING REIM acquisition. The change in methodology has not had a material impact on its AUM calculation. The new methodology has been used to derive pro forma combined AUM as of September 30, 2011.
